DETAILED ACTION

1. Claims 1,50,79, 104-110 have been canceled without prejudice. Claims 111-122 have been newly added. Therefore claims 111-122, are pending and are examined on the merits.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 2A-2D, 3A-3C, 4A-4C, 8A-8B, 9A-9B, and 10A-10B. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. Claims 111-122 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Regarding claims 111,114,115 and dependent claims thereof in the recitation of: the phrases "in mass", "mass transfers", "transferring in mass", are indefinite because it is not clear how one would transfer and ensure that nucleic acid molecules have been transferred together; the phrase "first vectors", is indefinite because it is unclear what is constituted by first vectors, for example is anything before the cloning into an expression vector considered a "first vector"?

Art Unit: 1642

5. Regarding claims 111,120,121, and dependent claims thereof in the recitation of the phrase "polyclonal recombinant DNA" or "polyclonal nucleic acid", it is unclear as to the meaning of this term, because the term polyclonal when referring to nucleic acid molecules has not been defined in the specification. Therefore, one of skill would find it difficult to fully understand the scope of the invention.

Conclusion

The no claims are allowed. The claims are free of the prior art.
